Subject: Re: Microsoft settlement

Dear Sirs,

How does letting Microsoft flood the education market with its operating system help discourage them from their current monopoly status? This proposed agreement does nothing to Microsoft short of making them dish out some cash over the long-haul, which, by all accounts they can well afford.

I for one am VERY disappointed in this agreement and in those that helped draft it. It goes against logic and reason and should be discarded immediately.

Respectfully,

Gedeon Maheux
